No Hiding Place for Lesion

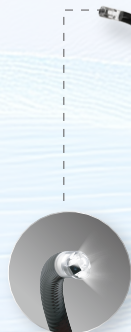

Single-Use Video Flexible Cysto-Nephroscope

RP-U-C01F/ RP-U-C01FS

Ergonomically designed lightweight handle maximizes maneuverability and surgical benefits

Integrated T-valve offers convenient usage

Unique transparent tip design brings brighter, and better images

Specifications

Field of view	120°
Direction of view	0° (front view)
Depth of field	3-100mm
Image sensor and illumination	Integrated distal CMOS and dual LED
Outer diameter	15.0Fr
Inner diameter	6.6Fr
Bending angle	up225°, down135°
Working length	380mm

Multi-layer material building in molding snakebone with better bending resistance makes outstanding coaxality

V2000

Extra simpleness & powerfulness

- Powerful data management
- Adaptable screen angles
- Intuitive UI
- Customizable buttons

Excellent compatibility

- Extensive external interfaces
- Compatible with all REDPINE Endoscopes
- Dual-scope combination for complex condition

Extreme safety

- Real-time image processing
- Strong anti-interference capability
- Emergency protection
- Patient privacy protection

Exclusive patented technology

- Enhanced image details
- Automatic recognition of different endoscopes for various departments
